

LOBBY

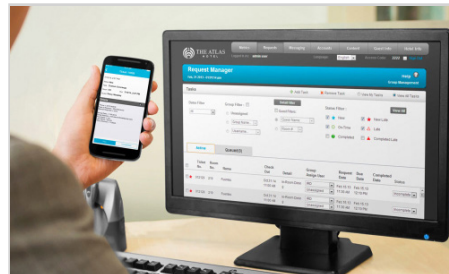

*Available as an add-on to Bedside
 An opportunity for a hotel to provide essential digital tools that are easily accessible by all guests.

REDUCE LINES, SUPPORT STAFF

Long waits at the front desk are proven to significantly diminish guest satisfaction. Providing a resource that can help guests find information to frequently asked questions and solve common needs reduces the strain put on the front desk staff and allows them to focus on more detailed guest requests and operating procedures. Customized menus from a wide selection of services, including:

- General hotel information
- Information & maps about local attractions
- Flight information
- Print boarding passes
- View transportation schedules

BACK-END BENEFITS

Intevity Lobby includes our trademarked ICE Control Panel, a back-end management panel that empowers your staff to truly revitalize the level of service offered.

- Edit content in real time
- Accessible via desktop & mobile
- Immediate access to business intelligence & metrics

MINIMAL INVESTMENT REQUIRED

While some brands invest millions in an internal Research & Development team, Intevity can create and test a complete guest services application to eliminate this hassle.

Benefits of working with our team:

- Experience in creating guest services applications for hotels
- Flexible, cost-effective pricing packages
- Products created with your guests in mind
- Unique branding based on client specifications

KEY FEATURES

AIRLINE BOARDING PASS

Intevity Lobby lets guests easily access flight information, maps about local attractions, and print their boarding passes without the hassle of waiting in a line at the front desk.

EASY-ACCESS TO SERVICES

Conveniently located in the high-traffic areas of the hotel, Intevity Lobby provides quick-and-easy access to concierge services at the push of a button.

SUPPORT

Nearly 24/7 technical support from our team of experts to ensure that your services work as planned.

Device Requirements:
 iOS - iPad2 or higher
 Android - Nexus 7" or 10"

Easy-to-use guest-facing interface that is compatible with both Apple and Android devices and available in multiple languages.
