

Edison

Intility's Room Controls

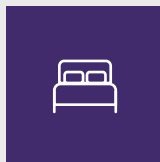

WHAT YOU GET WITH EDISON

CUSTOMIZED INTERFACE

Edison is a custom server developed by Intility to manage the robust integrations between Room Control providers and Intility's ICE.

LUXURY GUESTROOMS

Room lighting, temperature, and drapery can be controlled from the comfort of a hotel bed using wireless capabilities and a custom-made interface to place controls in a centralized location.

EXCEED GUEST EXPECTATIONS

Guests want greater automation to their overall hotel experience. Personalize your guest's experience by allowing them to have complete control over their room's thermostat from their Bedside tablet.
