

MESSENGER

This integration with the Intelity platform allows for multi-channel messaging in real-time between the hotel and its guests.

USE YOUR OWN DEVICE

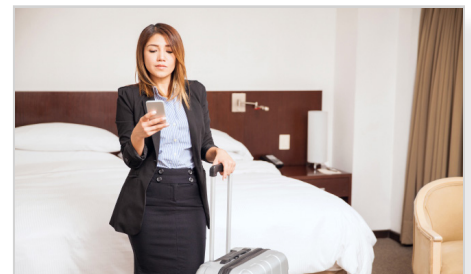

Intelity Messenger incorporates two-way guest messaging for SMS, MMS, Facebook messaging, Twitter, and more. This communication channel will also allow the property to achieve true two-way communication with guests within the Intelity platform.

DYNAMIC MARKETING STRATEGY

Intelity Messenger creates a non-intrusive interaction between staff and guests. Use Messenger for:

- Marketing messaging
- Push notifications
- Geo-fenced messages
- Promoting engagement and growing revenue

CUSTOM BUILT FOR HOTELS

Intelity Messenger is custom built for the hospitality industry. Requests can easily be routed through our platform, dispatching staff quickly and within the workflow used for other digital requests.

KEY FEATURES

SMS & FACEBOOK

Easily transition into messaging by providing communication channels on social platforms that your guests are already used to.

INTEGRATES EASILY

Intelity uses state-of-the-art APIs to enable its ICE software to share data with a variety of hotel management systems. By linking these systems with Intelity's Platform, hotels can create one digital environment to operate all of their processes.

SUPPORT

Nearly 24/7 technical support from our team of experts to ensure that your services work as planned.

Available on:

Easy-to-use guest-facing interface that is compatible with both Apple and Android devices and available in multiple languages.
