# ROOM CONTROLS

## What is Intelity's Room Control Integration and What Does it Do?

Intelity's Room Control Integration provides the hotel with the ability to personalize their guest's experience by allowing them to have complete control over the thermostat, lighting, sheers and drapes through the use of the Intelity platform on the hotel-provided tablet. Guest have access to a custom interface developed by Intelity to manage the robust integrations between room control providers and the Intelity Platform.

## How Does it Work?

Guests use a custom interface developed by Intelity to manipulate their atmosphere settings. These may include room lighting, room temperature, fan settings, atmospheric settings, the operation of sheers and drapes, the option to have the room cleaned, and the option to request privacy through "Do Not Disturb" settings.

## What Room Control Providers Does Intelity Integrate With?

1. Crestron
2. Control4
3. Evolve
4. INNCOM / Honeywell
5. Lutron

## What Do I Need to Get Started?

Prior to the integration with Intelity, your hotel must provide the following:

- The specific part or module needed for room control integration
